

How to Install a Root Chain for Use with **DoD ECA Digital Certificates Using** Microsoft<sup>®</sup> Edge

Before you can use your IdenTrust ECA digital Certificates, the IdenTrust ECA Subordinate and ECA Root Certificate must be installed in your browser. This process is performed automatically during the retrieval of the certificate. These instructions are provided only in the case that such process does not execute properly or that you need to install the ECA root chain on another computer.

## **Download the IdenTrust ECA Subordinate Certificate**

- Access the Defense Information Systems Agency (DISA) website where ECA Subordinate certificates are available: 1. https://crl.gds.disa.mil/
- Determine which IdenTrust ECA Subordinate certificate you need to use with your ECA certificate: 2. • For ECA certificates installed on or after May 28, 2019 until April 30, 2022, select IdenTrust ECA S22
  - For ECA certificates installed after April 30, 2022, select IdenTrust ECA S23
- 3. Select the IdenTrust ECA certificate you wish to install and click "Submit Selection".

4. Launch the subordinate CA certificate download by selecting "Download".

5. Open the downloaded certificate file. A Certificate window will open.

## **Install the Certificate**

1. Select "Install Certificate". This will launch the Certificate Import Wizard.

👰 Certificate	×	
General Details Certification Path		
Certificate Information		
This certificate is intended for the following purpose(s): • 2.16.840.1.101.3.2.1.3.6 • 2.16.840.1.101.3.2.1.3.7 • All application policies		
Issued to: IdenTrust ECA S22		
Issued by: ECA Root CA 4		
Valid from 5/7/2019 to 5/7/2025		
Install Certificate Issuer Statement		
OK		

2. Select "Next" to start the import wizard.

🗧 😼 Certificate Import Wizard
Welcome to the Certificate Import Wizard
This wizard helps you copy certificates, certificate trust lists, and certificate revocation lists from your disk to a certificate store.
A certificate, which is issued by a certification authority, is a confirmation of your identity and contains information used to protect data or to establish secure network connections. A certificate store is the system area where certificates are kept.
Store Location
