

DIGITAL CERTIFICATES

TrustID | Secure Email | Email | Identity | Hardware Storage | Certificate

Product Summary

TrustID | Secure Email | Email Identity | Hardware Storage certificates are used to protect your emailed communications from major email clients such as:

Microsoft® Outlook, Mozilla® Thunderbird, and Apple® Mail, and is issued to an applicant's confirmed email address.

This certificate is bound and stored on a FIPS 140-2 compliant hardware device (USB token or Smart card). This certificate can be used with multiple PCs or laptops if the ActivID® software is installed.

Because TrustID certificates are publicly trusted, affiliated programs are not applicable. Anyone can trust your signature or email secured by your TrustID | Secure Email | Email Identity | Hardware Storage certificate.

	Supported Countries list				

Browser Support

Browser Based	Edge	Chrome	Firefox	Safari	iOS
Certificate can be retrieved using these browsers	✓	✓	✓	\	✓
The private key of the hardware Certificate cannot be exported					

Certificate Usage

This certificate can be used for:

- Email Signing
- Email Encryption

This certificate is issued only to a confirmed email account and not considered an identity-based digital certificate. It is not valid for other PKI functions such as signing digital documents, signing code, or securing servers or SSL communications.

This is a portable certificate and can be used on any computer where the hardware utilities drivers have been installed.

Technical Specifications:

- X509 v3 digital certificate
- 2048 RSA bit key length
- SHA-256 signature hash algorithm
- CRL and OCSP validation
- Natively trusted by above mentioned browsers
