Product Summary

IGC | Basic Assurance | Individual Identity | Software Storage certificates and IGC | Basic Assurance | Individual Identity | Hardware Storage certificates are issued under the IdenTrust Global Common Certification Authority Policy program and are cross-certified under the U.S. Federal PKI Common Policy Framework.

The IGC Federal Bridge Certified certificates are accepted by government agencies and used by individuals who are not affiliated with a sponsoring organization to securely conduct business in a digital world.

The Software Storage certificate is safely stored in the browser certificate store on your local PC or laptop and can only be used on a single device.

The Hardware Storage certificate is bound and stored on a FIPS 140-2 compliant hardware device (USB token or Smart card), and can be used with multiple PCs or laptops if they have the ActivID software installed.
