

## Adding IdenTrust Timestamping Server to Adobe® Acrobat or Adobe® Reader

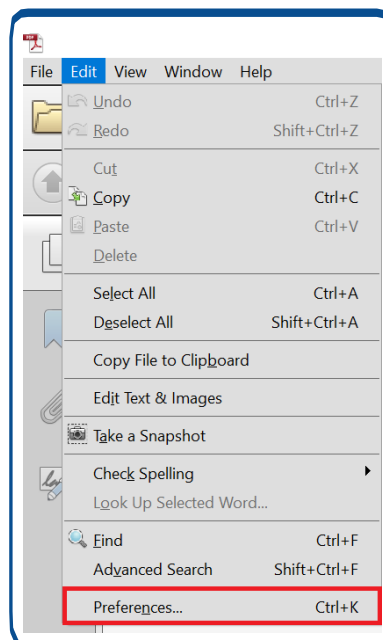

IdenTrust Timestamping Server Authority Server is a service that binds the digital certificate used to sign a digital file with the data being signed, creating a unique sequence of characters or encoded information known as hash, and also identifies when a certain event has occurred. The result is a trusted accurate digital date and time stamp seal embedded within the digital file that contains X.509 digital signatures. Any change in the timestamped file will break the timestamp seal alerting the user that the file is no longer in its original state.

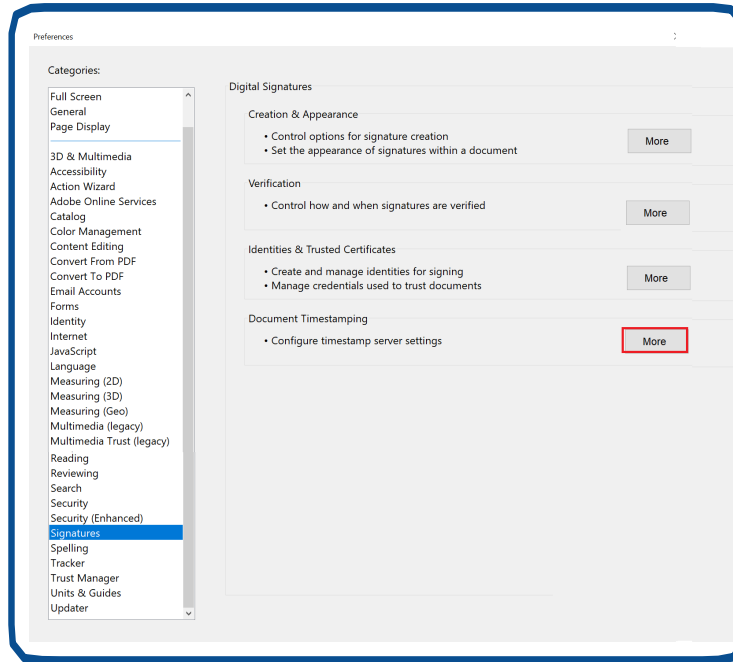

Users who wish to add timestamping to PDF files that are signed with IdenTrust personal or business digital certificates must add 'http://timestamp.identrust.com' as the Timestamping Server to their local Adobe® Acrobat or Adobe® Reader configuration.

### Instructions

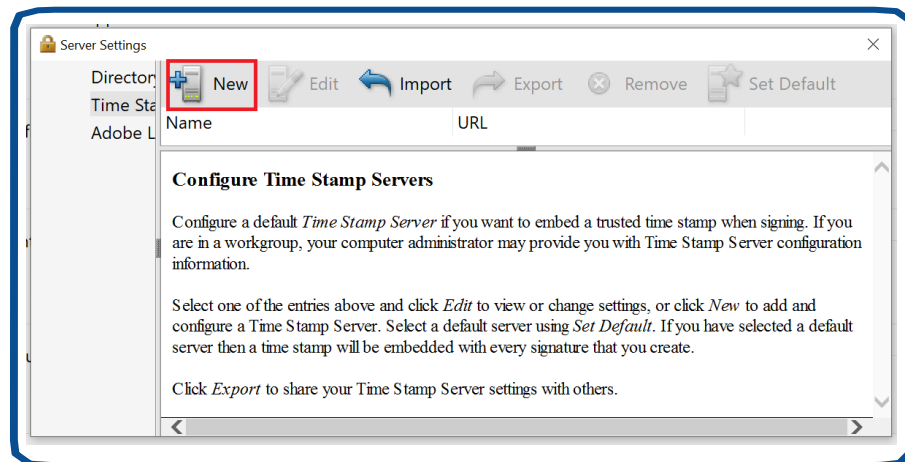

1. Open Adobe Acrobat or Reader and click on Edit | Preferences.

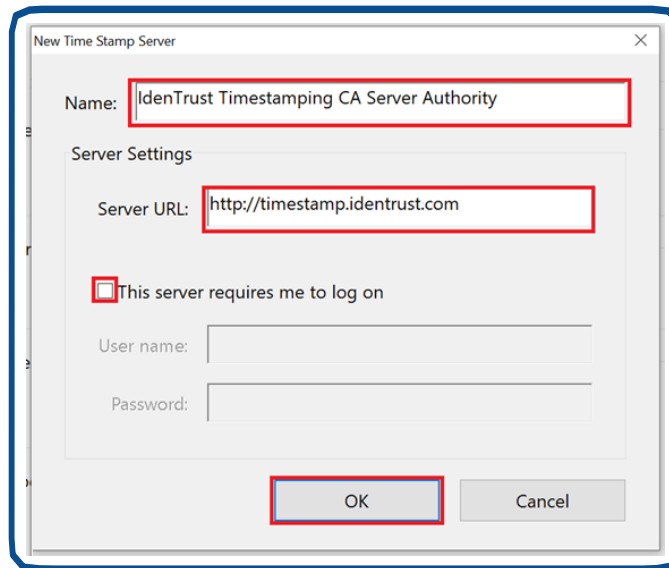

2. Select Signatures and click on 'More' in the Document Timestamping section.

3. Click on the New icon to add a new Timestamping CA Server Authority.

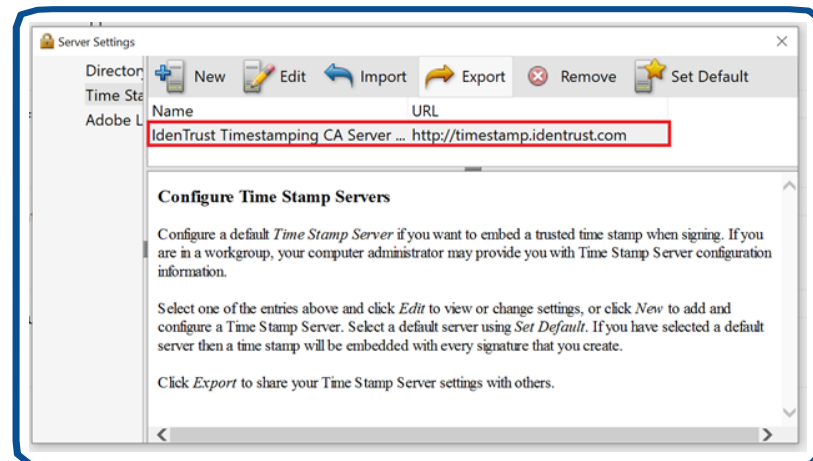

4. Complete the New Time Stamp Server form.
  - a. For name, type 'IdenTrust Timestamping CA Server Authority'
  - b. For Server URL, type "http://timestamp.identrust.com"
  - c. Do not check the option 'This Server Requires me to Log on'
  - d. Click [OK] to save the configuration

The screenshot shows a dialog box titled "New Time Stamp Server". It has a "Name:" field with the text "IdenTrust Timestamping CA Server Authority". Below it is a "Server Settings" section with a "Server URL:" field containing "http://timestamp.identrust.com". There is an unchecked checkbox labeled "This server requires me to log on". Below the checkbox are fields for "User name:" and "Password:". At the bottom, there are "OK" and "Cancel" buttons, with the "OK" button highlighted by a red rectangle.

5. Confirm that the link has been added.

The screenshot shows a "Server Settings" window with a table of configured time stamp servers. The table has two columns: "Name" and "URL". The first row contains "IdenTrust Timestamping CA Server ..." and "http://timestamp.identrust.com". Below the table is a section titled "Configure Time Stamp Servers" with instructions on how to use the settings. The "OK" button is highlighted with a red rectangle.
